

Water Main Maintenance

Kathleen Street in Dunhill Estate

The water main on Kathleen that was repaired last month needs further attention. It is believed that a small leak has occurred in a water service connection. It is also believed that this can be accomplished without a complete shutdown of the main. The water main repair is scheduled for the week of November 14th.

You will, however experience a reduction of water pressure during the repair. You may continue to normally use the household faucets. You will notice the pressure increase to normal when the repair is completed. Please call Village Hall at 847-428-2861 or Public Works 847-428-4167 with questions or concerns.
